# Changing the Chart's Appearance Using Advanced Formatting

Editing the Chart's properties

- Go to the **Ad Hoc View Panel** and click on the ⚙▾ icon to open the **Canvas Options**
- Select the **Chart Format…** option from the menu and the window will open.
- Click on the **Advanced**
- Click on the **Add New Property**.
- In the **Property** field, add the chart property you want to format and enter the values for the property.
- Click on the ✔ icon and save the formatting.
- Click on **Apply** and then **Close**. The chart is updated with the new formatting.
- Remove the formatting by opening the **Advanced** tab and click on 🗑 next to the property you want to remove.
