

# Getting New Perspectives on Data

QR-Patrol PRO provides the user with the unique functionality of accessing his/her reports (after he/she has created them) and formatting them in the way he wants his data to be shown. In this section we will see the following customizations you can apply to the user created reports:

- **Column Formatting**
- **Conditional Formatting**
- **Interactively Filtering Report Output**
- **Interactively Sorting a Report**
- **Moving, Resizing and Hiding Columns**
- **Setting Output Scale**
- **Exporting Options**
