[Interactively Filtering Report Output](#)

When a report contains more data than desired the user can interactively filter it to display only the data needed. Apply conditions by selecting the column to use as a basis for filtering. Enter a filter condition then a value for comparison. Below we display the conditions available for each type of column: **numeric**, **data** and **text**.

Numeric	Date	Text
Equals	Equals	Equals
Does not equal	Is not equal	Is not equal
Greater than	Is between	Contains
Greater than or equal to	Is not between	Does not contain
Less than	Is on or before	Starts with
Less than or equal to	Is before	Does not start with
Is between	Is on or after	Ends with
Is not between	Is after	Does not end with
