

The Summary Tab

This tab includes summaries that show a result applied to all data values. It also lets the user set the default summary function for your calculated field or measure.

- **Calculation list:** Displays allowed summary functions for your calculated field or measure. The available options depend on the data type of the calculation. Depending on what you have selected you will see the following additional options:
 - > **Custom selection:** Displays the same options available in the Formula Builder Tab.
 - > **Weighted Average:** Displays a Weighted On drop-down list which allows you to choose another field or measure to use as the weight for the average.
